

Are you a medical student or junior doctor interested in surgery or anesthesia?  
Do you want to get involved in a multicentre international project?

# imagine

## Ileus **MA**nA**G**ement **IN**tErnational

**Patients:** Adult patients (>18Y) from around Europe and Australasia

**Intervention:** Elective bowel surgery

**Outcome:** Return of gut function, and measuring the impact of delayed return

**Impact:** Examining global practice variation will allow clinicians to improve patients outcomes

### Why get involved?

Work together on an exciting project with medical **students around the world**

Learn crucial **skills** in audit and research

Gain collaborative authorship on **PubMed-indexed** publications from the dataset

Get experience of **presenting** data to local and regional meetings

Chance to a make a real difference to the care of **patients** undergoing surgery
